

This time board count was against us but we managed to come back in the last 4 games to edge the win 7.5-8.5

I'm beginning to get used to these close results. We tried to find a neutral venue but were beaten by (a) a beer festival at the first choice venue and (b) the bar staff wanting to lock up and go home at 3pm at the second choice (lucky we found that one out in time). Both were in Peterborough anyway, so no great problem to move the match back across the border
