Introduction

This ebook is designed to compliment the series of London System videos on YouTube.com/ChessCreator. It contains 20 instructive games, played by chess legends such as - Blackburne, Capablanca, Lasker Nimzowitsch and Maroczy.

The London System begins with 1.d4, with an early Bf4, pawns on c3/d4/e3, often with Bd3, Nbd2 and Ngf3. The opening is more about positional development, and flexible piece play, than outright attack; there are solid lines against QGD, KID, QID, Dutch et al.

An often under-rated opening, the London System is simple to learn, and very solid - for white. The London System can transition into Colle System (c3) and Stonewall Attack opening and - in some lines with c4 (instead of c3) - into Queen's Gambit territory.

In the 1900-1920s era, the London System was at its height - used on a regular basis, by almost all the top players. GMs using the London System in the modern era, include Kamsky, Kovacevic, Yusopv and Bronstein.
