Kevin O'Connell kevinocconnell12@gmail.com

Revised 2010.08.16

NB figures for some countries do not balance because there are some or many players of unknown age (assumed to be male adults)

Population figures from EU web site europa.eu, except for England, Scotland, Wales, Guernsey, Jersey, Faroes & Israel (Wikipedia)

all population figures are rounded to nearest 100,000, hence a few 0.0! (for which I have multiplied x20 for /M numbers)

Figures from May 2010 FIDE Rating List thanks to the wonderful work of the French amateur Fabrice Touvron:

<http://echecsetfab2.canalblog.com/archives/2010/05/22/17976935.html>

His file StatsFIDE.xls (5.9mb) can be downloaded from <http://dl.free.fr/getfile.pl?file=/R7GcwF1H>

NB French age categories are Petits pousins (u8), Poussins (u10), Pupilles (u12), etc. ... Juniors (u20); Senior=adult
