

MEMBERSHIP ANALYSIS 2015

This Membership Analysis is presented to Council as a supporting document to the Board's proposals on Membership rates. It is essentially the same document template as last year, with the removal of the attempt I made last year to project figures to the end of the season, and addition of an alternative analysis of renewals and an age analysis.

The projection to the end of the season was necessary last year because of the complication of substantial numbers of legacy memberships falling due between the date of the analysis and that date. As can be seen from the first page of the attached, this problem has now resolved itself, two or three months in advance of the anticipated time.

The analysis of renewals includes the data I was specifically requested to provide on the retention rate of members taking advantage of the Free Junior Silver offer. Having produced that data I felt that it would be of more value if I were to produce comparable data for retention rates for other classes of membership.

The age analysis is a first attempt, and should be regarded, more than the remainder of the document, as provisional data. It shows a number of anomalies, with junior members both apparently too old for that category, and also holding adult memberships unnecessarily. I have not yet had time to pursue these issues, which may reflect inaccuracies in data on dates of birth. I hope to be able to investigate this between now and the date of the meeting, and will give a verbal update on the position.

Dave Thomas
ECF Director of Membership

CONTENTS

- Current Membership, as at 1 March 2015
- Renewals Analysis, membership category at 31 August 2014 vs current category

The demographic analysis is made using membership at 31 August 14 and, where appropriate, comparing against the August 2014 grading list

- Activity analysis: number of games played by each category of member
- Grade analysis: median grade, and upper and lower quartiles, of each category of member
- Geographical analysis: members in each category in each County compared to number of active players on grading list
- Age analysis: age profile of members with known date of birth in each category
